CONCLUSIONS

Paraguay has made noteworthy efforts toward meeting the recommendations. The country has complied with nine of the 21 recommendations assigned in the Third Evaluation Round, 2003–2004.

In compliance with the recommendations, Paraguay has introduced improvements in controlling the use and distribution of pharmaceutical products by health practitioners, introduced mechanisms to respond to pre-export notifications of controlled chemical substances, and adopted the regulatory framework necessary to introduce formal mechanisms to evaluate controls in the area of controlled chemical substances and agencies involved in this matter.

As for control measures, Paraguay has established registers for obtaining information on firearms, ammunition, and explosives seized in cases of illicit drug trafficking, established registers on the transit of firearms, ammunition, and explosives, implemented a system to follow up on reports of suspicious transactions, increased the number of judges and public prosecutors trained in money laundering issues, and implemented a register on persons arrested, tried, and convicted for crimes of corruption related to illicit drug trafficking.
The country reports progress in increasing the number of training courses available for addiction prevention and treatment, implementing minimum standards of care, introducing improvements in systems to measure areas planted with cannabis and their yields, and creating a register on administrative and penal sanctions imposed for the diversion of pharmaceutical products.

Nevertheless, it is a cause for concern that the country has made no progress in ratifying the Protocol against the Illicit Smuggling of Migrants by Land, Sea and Air, or the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, their Parts and Components and Ammunition, since those recommendations were formulated during the Second Evaluation Round, 2001–2002. Similarly, the country reports no progress in creating systems for recording arrests, trials, and convictions for illicit drug trafficking, illicit possession of drugs, and illegal arms trafficking, as recommended during the Second Evaluation Round, 2001–2002.

Finally, there has been no apparent progress in creating a register on penal sanctions imposed in cases of diversion of controlled chemical substances, the implementation of a systematic information system on seizures of controlled chemical substances, and the adoption of the necessary regulatory framework for money laundering matters.

CICAD recognizes the efforts made by the country to comply with nine of the recommendations that were made and encourages Paraguay to continue working on compliance with the pending recommendations from the Third Evaluation Round, 2003–2004.
