National Drug Control System (NDS)

What is NDS?

• A Management Information System (MIS) for national and international drug control

• NDS combines the control of narcotics, psychotropic substances and precursor chemicals in one system

• Automates range of day-to-day drug control activities (import/export permits, licensing of companies, domestic transactions, company management)
What is NDS?

• Automates compliance with drug control conventions on narcotics, psychotropic substances and precursor chemicals

• Enables exchange of data electronically on national and international levels and fosters interoperability between different systems

Background

• Developed by UNODC
• Presentation at CICAD XXXIII
• Decision by Commission
• NDS in CICAD member states
Initiative

- CICAD-UNODC (Mexico City)
- NDS Central America

Participants

- Costa Rica
- El Salvador
- Guatemala
- Honduras
- Nicaragua
- Panama
Responsibilities

• CICAD
  – Server
  – Computers
  – Oracle license

Responsibilities

• UNODC (Mexico City)
  – Installation
  – Modifications
  – Training
  – Technical support
Responsibilities

• Countries
  – Maintain system
  – Internet charges

Status

• Server
  – purchased
  – installed
• Computers
  – purchased
  – delivered
  – installation
  – training
