Then we learned about “roofies,” and we banned Rohypnol from USA.
Adult Intervention

Youth Prevention
In the early 1990’s, youthful marijuana abuse trended upward.

Land of Coalitions Tomorrow

Regional Growth: South Florida Coalition Alliance

- Regional Media Market Campaigns
- Population Level Change Strategies
- Community Level, data-driven, science-based programs
New Challenges

Surveillance process reveals:

- Alcohol #1 drug abused by youth
- Abuse of medications across all age groups;
  Florida’s most deadly drug problem,
- Poly-substance abuse prevalent
- Heroin is increasing and crystal meth is here.

In the past, the cocaine dealers didn’t allow it. Today we won’t.
Keeping Children Alcohol-Free; delay age of first use.
• Key Lessons Learned:
  - Engage the Community
  - Develop data-driven local and regional prevention strategies.
    - Develop media partnerships in English, Spanish and Creole
    - Focus on parents (mothers a key)
    - Address underage drinking
    - Evaluate and Begin Again
When Our Hearts are Big and Our Minds and Hands Open, Our World Offers Unlimited Opportunities For Good Things to Happen.

Thank You to OAS and CICAD For Sharing and Enriching South Florida’s International Community With Your Experience and Wisdom.
