“The nexus between the Sustainable Development Goals and the Drug Policy: a focus from international organizations”

Miguel Malo S.

Pan American Health Organization (OPS/OMS) México
Health in the Agenda 2030
Sustainable Development Goals related to health

SDG3: Ensure a healthy life and promote well-being for all at all ages
Health: key to development

• Health is an important cross-cutting policy issue in international affairs, since it is an indispensable requirement, a result and an indicator of the dimensions of sustainable development.

• To achieve health, a multisector approach must be adopted to act on the social, environmental and economic determinants of health, with a view to reducing health inequities and enabling sustainable development.
Public health perspective - Ecological model

- Biological-genetic aspects
- Mental illness
- Age of first consumption

Unstructured families
Absence of support networks
Domestic violence
Consumption tolerance

De-characterization of the local culture
Drug trafficking / close circle in drugs
Consumption of alcohol
Absence of social networks
Absence / lack of preservation of public spaces
Missing school attendance / school dropout

- Inequalities
- Poverty
- Availability of drugs and firearms
- Children and adolescents are witnesses or victims of violence.
- Lack of alternative employment for young people

• Inequalities
• Poverty
• Availability of drugs and firearms
• Children and adolescents are witnesses or victims of violence.
• Lack of alternative employment for young people
The change of attention focus from individual drug consumption to action on social determinants and risk factors to diminish individual and collective vulnerability is the basis of the public health approach.
The change of attention focus from individual drug consumption to action on social determinants and risk factors to diminish individual and collective vulnerability is the basis of the public health approach.
The change of attention focus from individual drug consumption to action on social determinants and risk factors to diminish individual and collective vulnerability is the basis of the public health approach.
3.8 Achieve universal health coverage, in particular protection against financial risks, access to quality essential health services and access to safe, effective, affordable and quality medicines and vaccines for all.
