| Quality control of the surveys |
Program evaluation and space for articulation

Therapeutic Justice Pilot Program

National University of 3rd of February
Latinoamerican Study Center on Insecurity and violence (CELIV)

- Process evaluation
- Results evaluation
- Impact evaluation
Preventive strategies with Universities

With college careers
- To rethink the curricula
- To include prevention as part of the professional training

With the students
- To join the students here and now
- To reach them as Young people going through a crucial phase of their lives

Agreements with 17 national universities
“We must redouble the work with the universities in order that our future professionals’ training include the phenomenon of the problematic drug use as a dimension inherent to their professional practice”
Thank You
