Monitoring of medicines and substances subject to special controls

Electronic System

- Access to information
- Instrument for administering risks
- Promoting the rational use of medicines

Objectives

- Generate up-to-date and reliable information
- Modernize the registration process (“registry book”)
- Dynamize actions on control and prosecution
- Enable the tracking of products and substances
- Enable permanent monitoring

Operations of SNGPC

Accreditation of pharmacies or drug stores:

- Preparation of the establishment
- Training of the responsible technical person
- Inventory of products subject to special control

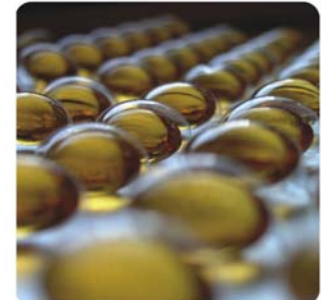

Operations of SNGPC

Transmission of movements

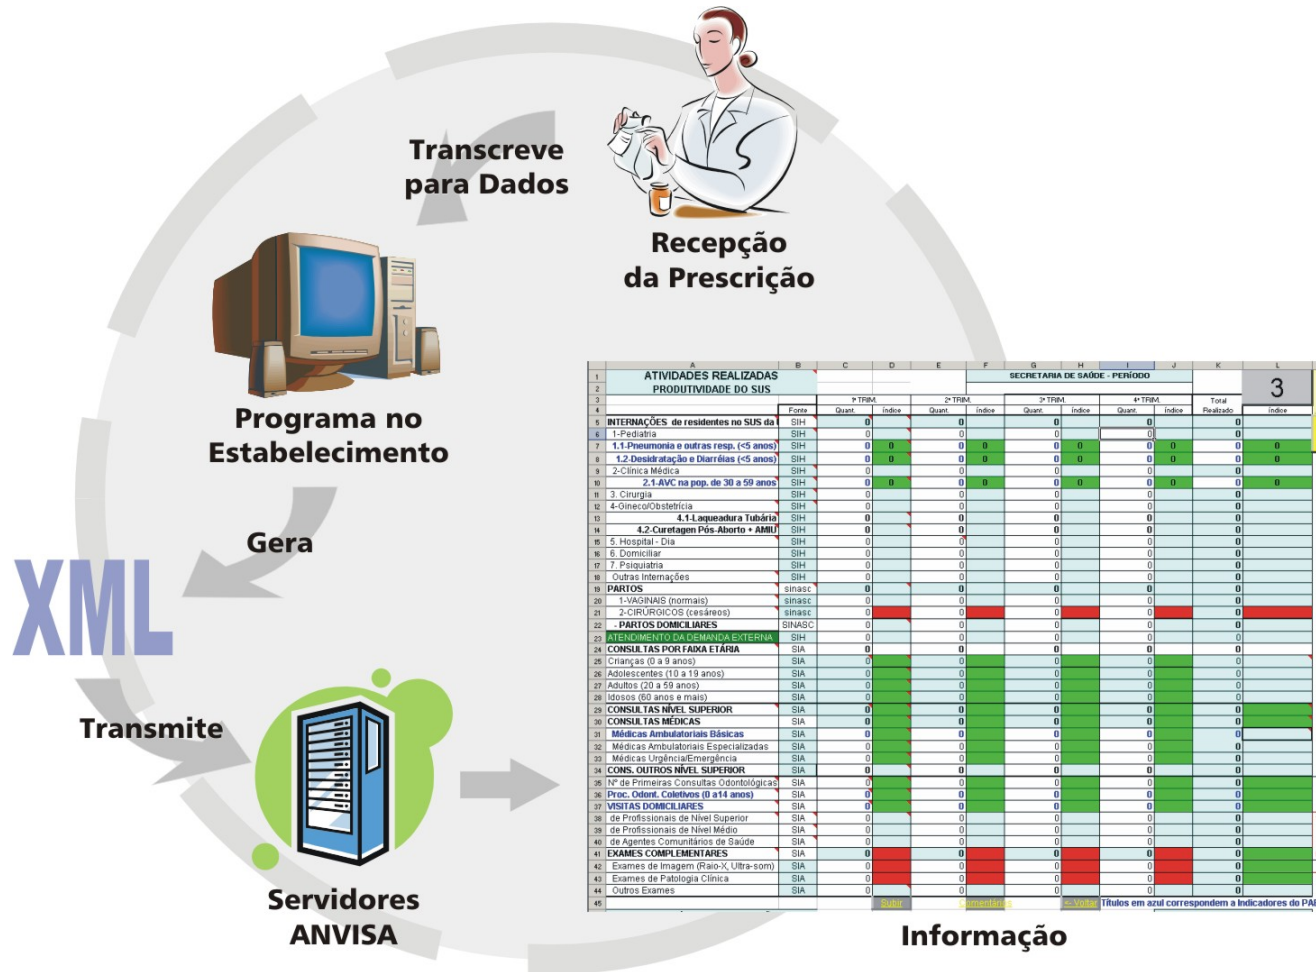

- Data via Web
- Model of transmission of SNGPC
- Security
- Periodicity (up to 7 days)

Identification Data

- Medicine
 - Registry number in MS
 - Production Lot
- Substances
 - DCB Number
 - Provider
 - Lot Number

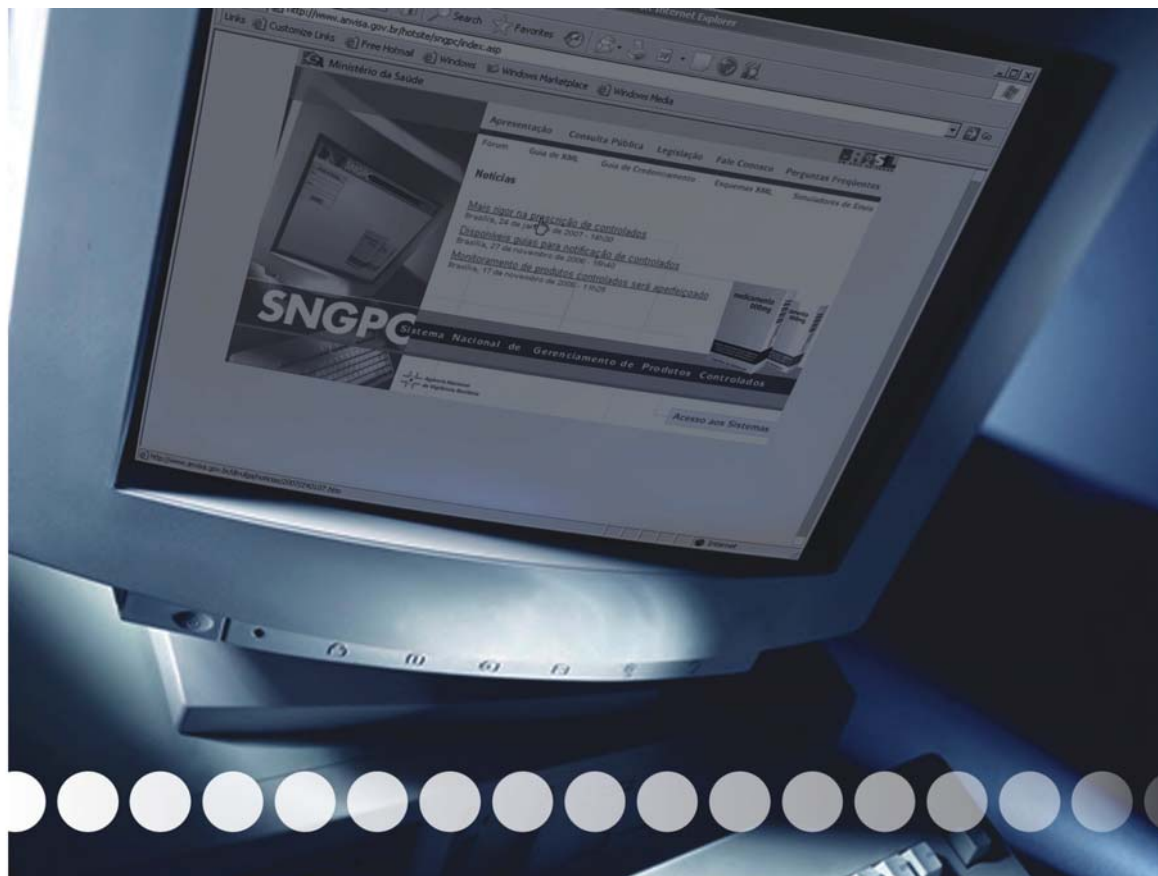

Process Architecture
