EXPECTED SITUATION 2013 (Goals)

SUPPLY REDUCTION

2. Disminution of the introduction, transit and distribution of illicit drugs, by means of improving the investigations, equipments and capacitacions for law enforcement agencies, and strengthening the exchange of information.
3. To have a Central Authority which centralizes exclusively the administrative controls in matters of administrative controls to prevent chemical diversion.
4. It is expected to have an integral network of prevention and control of money laundering, which includes appropriate, sufficient and efficient measures focused to prevent the use of the financial and non financial system of our economy be used as an instrument to hide the illicit origin of those capitals.
5. To have in place a National Recovered Assets Fund by means of which, all assets adjudicated to the National Antidrugs Office by the competent jurisdictional Organs will contribute to sustain supply reduction, demand reduction, and social development programs.

PROJECTS

Creation of specialized units for the control of prone zones that can be used for the introduction and trafficking of illicit drugs in the country. ([Control of aerial and maritime trafficking](#)).

EXPECTED SITUATION 2013 (Goals)

DEMAND REDUCTION

1. Strengthening human beings capacity to interact with their family, educational, working and community environments, among others, with the purpose of lessening risk factors and improve protection, thus preventing, in an integral way, drug consumption in our society in each of the following environments: Communitarian, educational, and working.
2. Improving the quality and reach of the assistance to drug dependents by means of the development of Orientation and Reference Centers within the Integral Diagnostic Centers network (CDI) and in the Integral Rehabilitation Halls (SRI), together with Centers for Treatment, Desintoxication and Rehabilitation in states (regions) and municipalities.

INSTITUTIONAL DEVELOPMENT

1. To make available a consolidated national investigation, information and documentation system, integrated with those institutions which develop actions in the field of drugs, that allows to reflect the real situation of this phenomenon in the Bolivarian Republic of Venezuela.
2. To strengthen international cooperation in the field of drugs, based upon the principle of shared responsibility.

PROJECTS

1. Development of treatment units ([creación and consolidation of treatment and desintoxication centers and COR's](#))
2. Integral prevention and protection plan Plan de prevención y protección integral "[Developing values for life](#)".

FINAL CONSIDERATIONS

1. It is necessary to strengthen the institutional support of the Interamerican Drug Abuse Control Commission during the *ex post evaluation* of the national antidrugs Plans/Estrategies of Member States.
2. It would be useful for those countries which are starting to formulate their National Antidrugs Plans in 2008, that the Secretariat could offer assistance by expertise areas in the de diagnostic, design, follow-up and control stages.
3. The support given by CICAD's Executive Secretariat during the process of formulation of the 2008-2013 Venezuelan National Antidrugs Plan, has been very much appreciated.
