Introduction:

Grenada Drug Information Network (GRENDIN)

The Grenada Drug Information Network (GRENDIN) is the mechanism through which Grenada coordinates the collection and dissemination of drug-related statistical information and other relevant information from all institutions involved in the area of drug control, or related matters. It is also a mechanism to inform policy makers and the general public. GRENDIN is comprised of institutions which work directly or indirectly in the area of drug control. Since its establishment by Cabinet in December 2002, GRENDIN has significantly strengthened Grenada's ability to participate in local, regional and international drug control projects and programmes. It has also played a major role in the implementation of the national drug control programme.

Name of Reporting Institution: Criminal Records Office, Royal Police Force
